INSTRUCTIONS FOR PAPERS

Your contribution (8-10 - A4 pages in MS Word), in Romanian or translated in English, must be the final version according to the following instructions:

Text will be written with TNR font, 12 pts, single spaced, distributed in the following sections: **Title, Abstract, Introduction, Materials and methods, Results and Discussion, Conclusion, Acknowledgments, References.**

The text will be written in two columns, after four spaces under the key words. **The page setup** will be: A4 with margins: top 3 cm, bottom 3 cm, left 2,5 cm, right 2,5 cm, header 1,27 cm, footer 1,27 cm. Notice that the header and footer are different for the odd and even pages. **Paper title** should be written with capitals, TNR 12, bold, centered.

Authors name will be written under title paper with TNR 11, centered, and will be preceded by a space. The affiliation contact address for the corresponding author will be written after one space with TNR 10, centered. **Abstract** should be written in English languages with TNR 11 Italic, centered, after 3 spaces, should count 200-250 words and have a structured form (background, material and methods, results, conclusion). Below the abstract, preceded by 1 space, will be written **keywords** in TNR 11 Italic. Key words should not repeat the title of the manuscript. Ideally, authors should use key words selected from the MeSH catalogue.

Introduction should provide a clear statement of the problem, the relevant literature on the subject and the proposed approach or solution. **Experimental** should be complete enough to allow experiments to be reproduced.

Results and Discussion should be presented with clarity and precision and should be explained, but largely without referring to the literature and should interpret the findings in view of the results obtained. **Conclusion** section contains a few sentences at the end of the paper and concludes the results and discussions. **Illustrations and tables** should be progressively numbered, following the order cited in the text. The same data should not be presented in both table and graph form. **Formula** should be clearly written and well separated from the text. Each formula should occupy one line. **References** should be presented in consecutive order (as they are cited in the text). The first six authors should be presented. Journal title abbreviations should be in Medline standard. Citations in the text should be marked by Arab numbers in brackets or in the upper. Each citation item should be placed in a separate paragraph.
